

## (ROUND) BALE CLAMP

The AP bale clamp, type BK, is developed for a secure picking-up of both wrapped and unwrapped round bales. The smooth inside of the arms avoids film damages.

The bale clamp is equipped with several springs to enable an independent arm movement and to make sure the bales will always be clamped. Shifting of the bales is therefore prevented.

Technical specifications BK	
Opening range	80 - 180 cm
Weight	200 kg
Suitable for	<ul style="list-style-type: none"> <li>• Wheel loader</li> <li>• Tractor with front loader</li> <li>• Telescopic loader</li> </ul>
Necessary hydraulic power	25 l./min. - 180 bar (max. 50 l./min. - 200 bar)
Requires	1 double functioning valve
Equipped as standard with Euro attachments, other are optional	

### FEATURES

- Smooth inside avoids film damages
- Arms can move independently, which prevents the bale from shifting
- Simple but robust construction
- Limited maintenance
